1. Claims 1-8 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose or make obvious a photovoltaic solid state relay having a pair of output terminals comprising, in addition to the other recited features of the claim, a bipolar transistor having a base connected to a junction between first and second unipolar transistors for establishing a second current conducting path in parallel to a first current conducting path between the output terminals in one of opposite directions depending on voltages applied to the output terminals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
